Dear Judge,

I am a middle school teacher, and only have recently gotten comfortable working on a computer for any reason besides using a word processor. When my daughter Lindsay told me about this campaign, I thought I should participate. I try and teach my students to be fair and to challenge them to create. If there was no competition for Microsoft, I think it would stop the growth of the computer industry. You do not run a race by yourself, you out run opponents. If there were no opponents, you could not compare yourself to others and improve. This Proposed Final Judgement is wrong and should not be approved by you, Judge Kotelly, it goes against the free market ideals that our democracy is partly founded upon. Thank you for your time.

Sincerely,
Regina Ragan
